

- 2013, April 12th **Marc VIDAL** – Interactome networks & human disease
- 2014, November 7th **Adrian BIRD** – CpG as a genomic signalling molecule
- 2015, May 22nd **Paul NURSE** – Understanding cell cycle control
- 2015, November 24th **Margaret BUCKINGHAM** – Skeletal muscle stem cells
- 2016, June 21st **Jennifer DOUDNA** – CRISPR: the new era of genome engineering
- 2016, Sept 14th **David GILBERT** – Developmental control of replication timing
- 2017, June 2nd **Danny REINBERG** – Epigenetics: one genome, multiple phenotypes
- 2017, November 9th **Yoichi SHINKAI** – Role & regulation of histone K9 methylation
- 2018, June 22nd **Frank GROSVELD** – Tx factors & 3D architecture in hematopoiesis
- 2019, March 29th **Arnold BERK** – The YAP & TAZ of the Hippo pathway
